Sent

v1.0 · Confidential · sentapp.net

> *The free tier isn't the product. It's the reminder of what you're missing.*

Part 1 — Tiered Intelligence Model

Sent's AI capability is tiered by subscription level. This is not just a feature gate — it is the core product philosophy. Every tier delivers a genuine Sent experience. The difference is how personal, how intelligent, and how automated that experience is.

Critically: every interaction at every tier feeds the data flywheel. Even preset selections tell us what voice archetypes resonate, what occasions matter, and what media lands. Free users are not just customers — they are training data contributors.

Free Tier — Curated Intelligence

Free users experience the best of what Sent has pre-built. Preset examples, curated archetypes, fixed occasion types. It looks great. It feels personal. It is genuinely better than anything they were doing before.

- Preset voice archetype examples — one curated message per archetype per occasion type
- Fixed occasion library — birthdays, graduations, new babies, promotions, retirements
- 3 messages per month
- Up to 10 contacts
- Manual social data pull
- 1 GIF per message (curated suggestions)
- Video up to 15 seconds
- Sent Gift up to $25

Note: *Free tier still captures data. Archetype selections, occasion types, media choices — all feed the flywheel.*

Sent+ — AI-Generated Intelligence ($4.99/mo)

Sent+ unlocks real AI generation. Messages are no longer preset — they are generated from the recipient's actual life context and the sender's chosen voice. This is where Sent becomes genuinely personal.

- AI-generated messages — references recipient's actual recent activity

- Full occasion library — all occasions including condolences, holidays, custom
- Unlimited messages
- All delivery channels — SMS, email, LinkedIn, Instagram, WhatsApp
- Photos up to 10 per message
- Unlimited GIFs + AI picks
- Video up to 60 seconds
- Digital Postcard Builder
- Sent Gift up to $100

Sent Pro — Full Intelligence ($12.99/mo)

Sent Pro is the complete system. AI learns the sender's actual writing style over time, building a voice fingerprint that makes every message sound authentically like them — not just an archetype.

- Everything in Sent+
- Voice fingerprinting — AI learns your actual writing style over time
- Voice notes — AI-scripted, recorded in your voice
- Analytics dashboard — delivery, open rates, response rates
- CRM sync — Salesforce integration
- Sent Gift up to $500
- Priority support

Tier Comparison

Feature	Free	Sent+ $4.99	Pro $12.99
Message generation	Preset examples	AI-generated	AI + voice fingerprint
Messages/month	3	Unlimited	Unlimited
Occasions	Core 5	Full library	Full library
Photos	3 per msg	10 per msg	Unlimited
GIFs/Memes	1 curated	Unlimited + AI	Unlimited + AI
Video	15 seconds	60 seconds	3 minutes
Voice notes	—	—	✓ AI-scripted
Postcard Builder	—	✓	✓
Sent Gift	Up to $25	Up to $100	Up to $500
Analytics	—	—	✓
CRM sync	—	—	✓ Salesforce

Part 2 — 30-Day Pro Trial & Retention Engine

Every new Sent user gets 30 days of full Pro access — no credit card required. The goal is not just to show them the product. The goal is to make Sent part of their daily emotional life before they ever see a paywall.

> *Give them the top tier for free for 30 days. Make them use it every day. Make it essential. Then remind them it's leaving.*

Phase 1 — The Hook (Days 1-30)

Full Pro access from day one. No restrictions, no friction, no credit card. The onboarding flow connects their social accounts, pulls their occasions, and sends the first AI-generated message within minutes of signup.

- Day 1: Full Pro unlocked. Occasions imported. First message generated.
- Days 2–20: Occasions fire automatically. Messages land. Recipients respond. The emotional ROI is immediate and personal.
- Every interaction trains the voice fingerprint — making every message more authentically theirs.

Note: *The trial is not a cost center. It is the most valuable data acquisition period in the product lifecycle.*

Phase 2 — The Squeeze (Days 21-30)

Starting day 21, prompts begin. Each one is warm, not pushy. The tone is 'we'd hate for you to lose this' — never 'buy now.' Discounts escalate as the deadline approaches.

Day	Trigger	Message	Offer
21	9 days left	Your Pro trial ends in 9 days. Don't lose your voice fingerprint.	40% off first 3 months
25	5 days left	5 days left. You have 3 occasions coming up next month.	50% off first 3 months
28	2 days left	Your trial ends in 2 days. Keep everything you've built.	50% off + 1 month free
30	Last day	Today is your last day of Pro. Your next occasion is in 11 days.	Best offer. One time.

Phase 3 — The Rollback (Day 31)

If they don't convert, they drop to the free tier. This is not a punishment — it is carefully designed loss aversion.

- They keep everything they made — postcards, saved messages, relationship memories all intact
- Voice fingerprint preserved but frozen — it won't learn anything new
- AI generation disabled — back to preset examples only
- The ghost of Pro haunts every interaction — they remember what it felt like

> *You keep the memories you made. You just can't make new ones — not like this — unless you come back.*

Phase 4 — The Long Game

Users who skip all trial offers and return to free still receive gentle, persistent reminders. Never aggressive. Always present. The discount becomes a standing offer that slowly creates urgency.

- Every app open: small persistent banner — "You're a founding member. Your discount is still here."
- Discount degrades slowly — 40% → 30% → 20% over 90 days — creating urgency without pressure
- Occasion-triggered prompts — "You have 3 occasions next month. Pro would handle all of them automatically."
- Anniversary prompt — on the 1-year mark: "You've been with Sent for a year. This is the lowest price we'll ever offer you."

Note: *The long game is not about annoying them into subscribing. It is about being present every time they feel the limitation.*

Part 3 — Sent Gift & Postcard Builder as Featured Stories

Both of these features are undersold in the current landing page. They are not media suite items — they are revenue stories and organic growth engines respectively. They deserve featured treatment.

Sent Gift — The Second Revenue Model

Sent Gift is not just a feature. It is a parallel revenue stream that compounds independently of subscriptions. Every gift sent generates a transaction fee. At scale, this becomes significant.

> *Remember the birthday card your uncle slipped a $20 into? That — but digital, instant, and built right into the message. No Venmo link. No 'I'll send it later.' The gift is the message.*

- Powered by Stripe — battle-tested, developer-friendly payments infrastructure
- Embedded as a tap-to-claim button inside the Sent message or postcard
- Transaction fee per gift — revenue stream separate from and additive to subscriptions

- Free: up to $25 per gift · Sent+: up to $100 · Pro: up to $500

Note: *Landing page treatment: Featured card with its own visual callout. Not buried in the media grid.*

Digital Postcard Builder — The Organic Growth Engine

The postcard builder is the most shareable thing Sent makes. When someone receives a Sent postcard and shares it, everyone who sees it asks 'how did they make that?' That question is the entire acquisition funnel.

- User photo framed as a vintage digital postcard with the Sent stamp in the corner
- Message on the back — AI-generated in the sender's voice
- Keepsake quality — people screenshot these, save these, share these
- Every shared postcard is a branded Sent impression with zero ad spend

Note: *Demo: A working interactive postcard builder demo on the landing page is the highest-priority engagement driver. Users pick a photo, pick an occasion, see a generated postcard. Free tier shows preset message. Sent+ and Pro show AI-generated. This is the proof of concept and the product tour in one.*

Part 4 — Implementation Notes & Cascade

This spec is the source of truth. All downstream assets update from here.

Files to Update

- sent_design_doc.docx — §6 Pricing & Tier Structure (replace with tiered intelligence model)
- sent_cribnotes.docx — add trial engine as a pitch talking point
- index.html — pricing section, demo section, Sent Gift feature callout, postcard builder demo
- sent_pitch.pptx — Slide 6 (Business Model) updated with trial engine
- sent_intro_map.xlsx — Pitch Scripts tab updated with trial talking point

Landing Page Priority Order

- 1. Sent Gift featured callout — between media suite and voices
- 2. Pricing section updated — trial prominently featured, tier intelligence described
- 3. Postcard builder demo — interactive, works at all tiers, highest engagement driver
- 4. Demo section reframed — positioned as free tier experience, upsell to AI generation

The One-Line Pitch for the Trial

> *30 days of Pro, on us. No card required. Keep everything you make.*

Relationships, remembered. ***Sent.***
